User Interview

1. How do you get weather information, including rain, wind, air quality, ultraviolet (sun)?

google weather. every second day

2. How do you get weather information, actively or passively? And why?

passively. it shows on my google feed

3. How often do you get the information?

every second day

4. How do you understand weather data (such as temperature, UV index, wind speed, rainfall possibility, PM2.5 value)?

i look at the weather symbol. rainfall possibility (if its over 30% i think it could rain)

5. Can you describe the situation when weather caused embarrassment to you?

being caught in the rain when riding home. i feel that all the other cars are looking at me

6. To what extent do you care about the weather information?

not much. brisbane is hard to predict

7. What do you do to deal with weather issues?

wear loose clothes when it is hot, otherwise pants and a long sleeve shirt. I dont use sunscreen .. i wear a cap and sunglasses occasionally.

User Interview

1. How do you get weather information, including rain, wind, air quality, ultraviolet (sun)?

web browser, google weather brisbane,

2. How do you get weather information, actively or passively? And why?

when planning for something special, going somewhere the weather is an issue. used to built-in app as well

3. How often do you get the information?

once/twice a week

4. How do you understand weather data (such as temperature, UV index, wind speed, rainfall possibility, PM2.5 value)?

only temperate, chance of rain. too hot, activity may be affected by rain. get used to high uv, as usual in Australia. does not impact my plan.

5. Can you describe the situation when weather caused embarrassment to you?

holiday, get the destination, 4-5 hrs, too cloudy, expected sunshine. swimming, but temperature was down.

6. To what extent do you care about the weather information?

not care if nothing special, e.g. going to events.

7. What do you do to deal with weather issues?

If i knew its high uv, campaign ("slip slop slap") put sunscreen when go to beach. not everyday, only when spend long time under sun. I should but I dont. little time outside, most time inside. sunscreen is expensive.
